Certified Sustainable to the Triple Bottom Line: Good for the Environment, the Economy and for Social Equity

Knoll® Moment™ Chair

To achieve SMaRT® Sustainable Product Certification at any level, products must achieve 14 prerequisite points and score a minimum of 28 out of 162 points in the following areas covering all product stages across the global supply chain:

- Safe for Public Health & Environment
- Renewable Energy & Energy Reduction
- Biobased or Recycled Materials
- Facility or Company Requirements
- Reclamation, Sustainable Reuse & End of Life Management
- Innovation in Manufacturing

Under these areas, products are required to:

- Provide Feedstock Inventory Documentation
- Document the Input and Output of Stockholm Chemicals
- Maintain a Manufacturing Facility Energy Inventory
- Keep an Inventory of all Biobased and Recycled Content Materials
- Have EMS Environmental Policies and Targets
- Have Social Indicator Reporting for Manufacturers (working conditions)
- Use ISO Life Cycle Assessment process
- Have Operational Reclamation and/or Sustainable Reuse Programs
- Have Product Performance Durability (long lasting products)

To earn a Sustainable Gold rating, the Knoll Moment chair earned 89 points:

SMaRT®		MTS
SMaRT® Consensus Sustainable Product Standard® Scorecard		
28/162	14/14	28/162
PR-1	Safe for Public Health & Environment	Required
PR-2	Renewable Energy & Energy Reduction	Required
PR-3	Biobased or Recycled Materials	Required
PR-4	Facility or Company Requirements	Required
PR-5	Reclamation, Sustainable Reuse & End of Life Management	Required
PR-6	Innovation in Manufacturing	Required
28/162	14/14	28/162
10/162	Safe for Public Health & Environment	30 points
30/162	Renewable Energy & Energy Reduction	30 points
40/162	Biobased or Recycled Materials	10 points
55/162	Facility or Company Requirements	15 points
89/162	Reclamation, Sustainable Reuse & End of Life Management	4 points

- 30 points:** Safe for Public Health & Environment
GREENGUARD Children & SchoolsSM certified
- 30 points:** Renewable Energy & Energy Reduction
Lubin Manufacturing Facility offsets 100% of electricity used at site with wind energy
- 10 points:** Biobased or Recycled Materials
40%+ Recycled Content
- 15 points:** Facility or Company Requirements
Completed ISO Life Cycle Assessment
- 4 points:** Reclamation, Reuse & End of Life
